Marc Terradas Zapata

Senior Software Engineer (Full Stack Developer)

Barcelona (Spain)

+5 years of experience in the development and delivery of software solutions. Proven ability to lead and manage software development teams, as well as to work in a team and independently. Strong technical skills in a variety of technologies.

Work Experience

Full Stack Developer at Andy

(2019-06 - Present)· Remote, Spain · Full time

· Lead developer and person in charge of the support of two McDonald's projects (example: https://pidetufactura.mcdonalds.es).
· Lead Andy's Frontend and Backend developments: (analyze the problem, document the tasks, develop in a scalable way, testing and document new functionalities and deploy to production).
· Design and implement Andy's infrastructure (microservices and CI/CD).
· Agile Methodologies (Sprints of 1 week with Scrum and Kanban).
· Assist support team with technical tickets.
· Training of apprentices.
· Assisting in the selection process (technical part).

Full Stack Developer at Kriter Software

(2018-06 - 2019-06) · Mataró, Spain · Part time

· Developed and maintained two e-commerce sites, providing customer support (example: https://gallissa.com).
· Developed and maintained internal scripts to automatize tasks and analyze data.

Studies and certifications

Bachelor's degree, Computer Engineering

Universitat Oberta de Catalunya · 2019

I completed the first year while working full time, now I am still studying but giving priority to work.

Associate's degree, web development (DAW)

IES Thos i Codina · 2017 - 2019

During the two years I learned how to code, and in the second year I started working as a developer while I was finishing my studies.

English - B2

Universitat Oberta de Catalunya · 2020
Currently studying C1
